

**ARK LMS 2.0**

## **ARK LMS Feature List:**

### **Administration**

ARK LMS follows the real world model which exists in a hierarchy structure rather than a flat model. An organization can be defined at the enterprise level and divisions comprise the different entities that fall under the parent company.

- Organizational setup
- Divisional setup
- Message and News system
- One click Customizable Interface
- Single login page for admin, author, instructor, and student

### **Management**

- Manager /Faculty Module
- User Management
- Course Management
- Course Catalog
- Search Options

### **Collaborative Tools**

- Message board
- Chat Room
- Email
- Calendar
- Library and White papers

## **Content**

- Can be launched at course, subject and chapter level
- Basic Content authoring tool included with ARK LMS

## **Assessment**

- Assignments – online submission and assessment
- Quiz bank - Question Types (Single line answers, multiple choice questions, fill the blanks, T/F). Tracks answers to each question allowing students to review test.
- Online Survey - Admin can build customizable surveys.

## **Reporting**

- Reports for Organizational Admin
- Reports for Divisional Admin
- Reports for Faculty / Manager
- Reports for Students /Employees

## **Personalize**

- Organization Admin can set color and appearance of screen to integrate with your company website
- Biography –information about your classmates if permitted

## **Helpdesk**

- Online Support System
- Extensive Help System
- Demo for quick learning

## **Standards**

- SCORM 1.2 Compliant

## Hosting Architecture:

### 1. Behind the Firewall Solution

This is an intranet based solution wherein the client purchases the Learning Management System Software and hosts on their intranet website. Please see Systems Requirement below for the same.

### 2. ASP Hosting

We host your online learning site on our server.

- We host on a 24x7 server assuring you of uptime and reliable service. We help you on initial setup and maintain your database.
- No need of maintaining a dedicated web server to host online learning database.
- No additional trained staff needed to maintain Windows 2000, IIS, SQL.
- Two free upgrade patches
- Content Development at concession cost using standard industry tools.
- Free email and phone call support

## Hosting Setup:

- Dell PowerEdge 1600 Servers
- 512K RAM
- Xenon 2.4 GHz 512K **Dual CPU**
- SCSI 2-36GB HDD, (15K RPM)
- Dual NICs
- Redundant Power Supply
- Microsoft Windows 2000
- Microsoft IIS
- Microsoft SQL Server
- Firewall

Microsoft Certified Professional Expertise
